

The Rialto Collection

Custom Made Wooden Venetian Blinds

OVERVIEW

The Rialto custom made wooden Venetian blind program provides you with peace of mind by going through the same stringent quality control as our shutter ranges. The collection draws upon the strengths of the Basswood range and utilizes many innovative designs and high-end components to exude style, craftsmanship, and to look stunning in any setting. The blinds are offered in a multitude of colours which match the shutters and enable hassle-free designing for any home décor.

Please note that the Head Rail colour will coordinate with the slat colour unless otherwise specified.

SLAT COLLECTION

Available in both 50.8mm and 63.5mm slats

50.8mm Slat

63.5mm Slat

With the choices of standard, routeless and corner edges in either design

CHOICES	STANDARD SLAT SHAPE	CORNER EDGE
Standard		
Routeless*		

The Routeless option has a notch at the back of the slat rather than having holes in the middle. This allows the slats to close tighter therefore offering better light control and privacy.

- Please specify the standard solid cloth tape color to which the decorative tape will apply. Lift cord colour will coordinate with the cloth tape color unless otherwise specified. Decorative tape will only show on the side facing into the room, unless otherwise specified.
- Dark colour ladder and pull cords such as T006, T008, T009, T010 and T012 tend to transfer colour onto the slats. For this reason, we recommend coordinating dark colour ladder and pull cords with dark coloured slats.
- Please note that all tapes are preshrunk polyester.

BILLOWY

The Rococo valance can coordinate with any of the Decorative Tapes if desired.

- Valance returns (see following diagrams)
 - There will be no valance return for standard inside mount; the valance will be butt cut.
 - Short returns are available on request for return Inside Mount (IB with valance return).
 - Outside mount blinds come with valance returns as standard.

BOTTOM RAIL DESIGN

Trapezoid Bottom rail

The Rialto Collection introduces an innovative bottom rail incorporating a flush bottom rail cap to minimize the gap at the bottom of the blind for recess mount, ensuring dent and scratch free window sills.

CUT OUTS

A cutout is a blind with an area removed from it to avoid an existing obstruction, i.e. a skirting board on a door recess. Please provide detailed measurements of the area to be removed. Please mark your measurements on a template of the cutout to ensure a perfect fit to your window.

CLEAT

With Child safety in mind, Designer Cord Cleats come with every blind you order.

The top measurement is critical because the headrail must fit.)</p> <p>Blind Width= ordered width minus 9.5mm (deducted by factory) Blind Height = ordered height</p>	<p>(Measure the desired width and height; to minimize light leakage the shade should overlap the window opening by at least 50.8mm on each side and at the bottom.)</p> <p>Blind Width= ordered width Blind Height= ordered height</p>

- Blind width may vary +/- 3.2mm and height may vary +6.4mm.
- Please indicate clearly if there are any side-by-side windows within the same room.
- Please note that blinds will be made to the ordered height measured in the open position i.e with slats horizontal

MULTIPLE BLINDS ON ONE HEADRAIL OPTION

Blinds $\geq 1829\text{mm}$ in width require additional lifting force. It is recommended that blinds $\geq 1829\text{mm}$ in width are ordered as Multiple Blinds on One Headrail.

- Options: 2-on-1 Headrail = 2 blinds on 1 headrail
3-on-1 Headrail = 3 blinds on 1 headrail
- A gap of 6mm is standard between multiple blinds on one headrail.
- Separate controls are required for each blind section. Please specify the control locations required.
- Alignment of slats cannot be guaranteed for Multiple Blinds on One Headrail.
